

Executive Portfolio Overview

Portfolio simulation • fully populated program-management artifact

Portfolio Summary

This portfolio demonstrates enterprise program management across four complex transformations with a combined simulated budget of \$20.4M. The artifacts are designed to show how strategy is translated into governed workstreams, measurable outcomes, executive decisions, resource plans, financial controls, and sustainable benefits.

Portfolio Scope

Program	Budget	Duration	Workstreams	Stakeholders
Enterprise Cloud Migration & Security Program	\$4,800,000	14 months	6	124
Customer Experience Optimization Program	\$2,100,000	10 months	5	86
Enterprise Digital Transformation Program	\$7,200,000	18 months	7	168
Healthcare Claims Modernization Program	\$6,300,000	16 months	6	142

What Recruiters Can Evaluate

- Ability to structure multi-workstream programs rather than manage a single project.
- Ability to manage financials, benefits, cross-project dependencies, capacity, risk, decisions, and change control.
- Ability to communicate program health in executive language using outcomes, variance, forecast, and decisions required.
- Ability to operate across technical, operational, customer, regulatory, and organizational-change dimensions.

Portfolio Disclosure

All artifacts are simulations created to demonstrate program-management capability. Metrics and financials are intentionally realistic and internally consistent, but they do not represent confidential employer information or claimed employment outcomes.
